Flowers from the Moon and Other Lunacies is a collection of horror and fantasy stories by author Robert Bloch. It was released in 1998 and was the author's third collection. This book collects for the first time a variety of Robert Bloch's early stories from Weird Tales and Strange Stories. These stories range from whimsical and funny to dark and disturbing. Bloch's infatuation with the work of H.P. Lovecraft can be seen in many of these stories. The stories are written in a style that is both accessible and challenging, and they are sure to delight fans of horror and fantasy alike.
